## Skills

- **Technical Exposure:** Python | HTML | CSS | JavaScript | SQL | Version Control | Data Analysis | Flask | PyTorch | JSON
- **Soft Skills:** User-Focused | Time Management | Communication | Team Collaboration | Adaptability | Problem Solving
- **Developer Tools:** Jira | Trello | Notion | Git | GitHub | VS Code | Azure | Google Cloud | Microsoft Office | Google Workspace | Slack | Figma
- **Concepts:** Machine Learning | Artificial Intelligence | Cloud Computing | Data Structures | Design & Analysis: Algorithms | Programming Language Concepts | Computer Org & Programming | Probability & Stats for CSC | Linear Algebra | Discrete Mathematics

## Experience

### Project Manager, Intern

#### Spartan Jewel

Atlanta, GA, USA 04/2024 - 08/2024

- Coordinated the delivery of Spartan Jewel's e-commerce platform by managing product requirements, aligning with 20+ manufacturers, and ensuring a smooth shopping experience across web and mobile.
- Oversaw integration of backend services and API functionality in collaboration with engineering teams to ensure real-time data sync and performance scalability.
- Managed the planning and rollout of order management features, including cancellations, returns, and exchanges, to support consistent functionality across platforms.
- Defined project milestones and facilitated collaboration between developers, designers, and business teams to streamline work flows and enhance system reliability.

### Sales Representative

#### Vector Marketing

Atlanta, GA, USA 01/2023 - 04/2023

- Exceeded monthly sales goals by adapting strategies to meet diverse client needs, aligning with organizational sales targets and brand expectations.
- Built lasting client relationships through a consultative sales approach, resulting in repeat business and increased referral rates.
- Generated \$25K+ in revenue by tailoring sales pitches to client pain points, improving conversion rates and customer loyalty.
- Boosted sales conversions by 15% through high-impact product presentations that focused on client value and key differentiators.

### Student Technology Facilitator

#### Georgia Tech

Atlanta, GA, USA 08/2022 - 12/2022

- Supported students during coding workshops and provided guidance on development tools and platforms.
- Introduced peers to new technologies and promoted hands-on exploration of basic coding environments.
- Helped manage access to learning tools, troubleshooting login or setup issues to ensure learning continuity.
- Served as a point of contact for resolving technical issues and promoting peer-to-peer engagement.

### Data & Operations Analyst

#### Johnny's Convenience Store

Waycross, GA, USA 06/2020 - 09/2022

- Used customer insights to design seasonal promotions, increasing sales by 25% and cutting inventory waste by 15%.
- Improved POS transaction speed by 30% and enhanced data security, streamlining checkout and improving customer satisfaction.
- Leveraged data to optimize digital signage placement, boosting in-store promotion engagement by 40%.
- Monitored IoT fuel sensors to reduce stockouts by 50% and maintain steady product availability.

## Education

### Bachelor of Science

#### Georgia State University

Atlanta, GA, USA 08/2021 - 05/2025

- **Major:** Computer Science | **GPA:** 4.0 | **President's List:** Fall '21 | Spring '22 | Fall '22 | Spring '23 | Fall '23 | Spring '24

## Projects

- **Portfolio Website:** Designed and developed a responsive multi-page website using HTML, CSS, and JavaScript, featuring external links, resume access, interactive UI elements, and custom hover effects for an engaging user experience across devices. (01/2025 – Present)
- **AI Expert System:** Developed a Flask-based web app that uses rule-based logic to diagnose diseases from unique symptom inputs, featuring real-time interaction, Python backend, and presentation at an AI research showcase. (03/2025 – 04/2025)
- **F1 Performance Predictor:** Built a machine learning model using PyTorch, Pandas, and PySpark to predict Formula 1 team results based on historical race data, deployed on Microsoft Azure for scalable performance testing. (10/2024 – 12/2024)

## Certifications

- Google Project Management – Coursera
- Data Analytics and Visualization - Accenture
- SQL for Data Solutions – LinkedIn
- Agile Project Management – JPMorgan Chase
- Project Management – Accenture
- Becoming a Product Manager – LinkedIn
